

Mistral 140 2H[®]

**For automatic grape berry sorting system
Air blade process**

**Capacity 6 - 10 T/H according to grape harvest
Simple and quick setting**

Adjustable level of waste

Feeding height 1550 mm

Leveling bar to adjust the capacity

3 interchangeable grids for bulky waste (20/22/24)

automatic elimination of the bulky waste

Horizontal conveyor width 350 mm to recover the
sorted berries – H output 850 mm

Horizontal conveyor width 350 mm to recover the
waste – H output 850 mm

Completely manufactured from stainless steel

Control panel with frequency drive for the air blade

Control circuit in 24V

Mistral 140 OLC[®]

For automatic grape berry sorting system

Air blade process

Capacity 6 - 10 T/H according to grape harvest

Simple and quick setting

Adjustable level of waste

Feeding height 1550 mm

Leveling bar to adjust the capacity

3 interchangeable grids for bulky waste (20/22/24)

automatic elimination of the bulky waste

Conveyor OLC width 500 mm to recover the sorted

berries – Elevation 1050 mm

Horizontal conveyor width 500 mm to recover the

waste – H output 850 mm

Completely manufactured from stainless steel

Control panel with frequency drive for the air blade

Control circuit in 24V

Mistral 140 2X90[®]

For automatic grape berry sorting system

Air blade process

Capacity 6 - 10 T/H according to grape harvest

Simple and quick setting

Adjustable level of waste

Feeding Height 920 mm

Leveling bar to adjust the capacity

3 interchangeable grids for bulky waste (20/22/24)

automatic elimination of the bulky waste

Horizontal conveyor width 350 mm and a conveyor OLC

width 500 mm to recover the sorted

berries – Elevation 1050 mm

Similar equipments to recover the waste

Completely manufactured from stainless steel

Control panel with frequency drive for the air blade

Control circuit in 24V
